PROFILE

Active Directory and Cloud Infrastructure Specialist with 15+ years' experience designing, securing, and automating hybrid identity environments using Entra ID, Azure AD Connect, GPOs, and PowerShell. Skilled in IAM, Zero Trust, and cloud identity governance across Azure and AWS, improving operational efficiency and enterprise security posture.

EXPERIENCE

HCLTech, Associate Consultant

Oct 2024 – Present

- Architect and manage enterprise-scale Microsoft Entra ID environments supporting hybrid and cloud-native identity solutions.
- Design and implement Conditional Access policies to enforce Zero Trust security across users, devices, and applications.
- Lead deployment and administration of Privileged Identity Management (PIM) for just-in-time privileged access governance.
- Implement Identity Protection policies to detect, investigate, and mitigate user and sign-in risks.
- Administer Entra ID Governance features including Access Reviews, Entitlement Management, and Lifecycle Workflows.
- Design and support hybrid identity solutions using Azure AD Connect, Cloud Sync, PTA, PHS, and ADFS.
- Manage enterprise application integration and Single Sign-On (SSO) using SAML, OAuth, OpenID Connect, and SCIM.
- Configure and secure B2B collaboration, Cross-Tenant Access, and External Identity solutions.
- Implement least-privilege access models using Azure RBAC, Custom Roles, and Administrative Units.
- Automate identity lifecycle management using PowerShell, Microsoft Graph API, and Azure Automation.
- Monitor and analyze Entra ID audit logs, sign-in logs, and security alerts to ensure compliance and threat detection.
- Govern application registrations, service principals, and managed identities for secure workload authentication.
- Perform Identity Security Assessments and implement Microsoft security best practices aligned with Zero Trust frameworks.
- Develop identity governance standards, access policies, and compliance controls for enterprise cloud environments.
- Collaborate with Security Operations and Microsoft Defender teams to strengthen identity threat protection and monitoring.
- Design high-availability hybrid identity architectures ensuring authentication resiliency and business continuity.
- Conduct root-cause analysis for complex Entra ID synchronization, provisioning, and authentication incidents.

- Managed Microsoft Entra ID Identity Governance capabilities, including Access Reviews and Entitlement Management.
- Implemented and maintained Microsoft Entra ID Identity Protection policies to detect and remediate risky users and sign-ins.
- Configured and administered Privileged Identity Management (PIM) for privileged role lifecycle management.
- Managed application registrations, Enterprise Applications, and service principals for secure application authentication.
- Designed and governed B2B collaboration and guest access strategies across multiple business units.
- Configured Cross-Tenant Synchronization and External Identities to support secure partner collaboration.
- Integrated Entra ID with Microsoft Defender and Microsoft Sentinel for enhanced identity threat monitoring.
- Established governance controls for application consent and delegated permissions to mitigate privilege escalation risks.
- Managed Administrative Units and custom Entra ID roles to support delegated administration models.
- Performed tenant-wide identity security assessments and remediation activities aligned with Zero Trust architecture.
- Configured Lifecycle Workflows to automate joiner, mover, and leaver identity processes.
- Developed Microsoft Graph API integrations for identity reporting, governance, and access management.
- Managed certificate-based authentication and federated identity trust relationships for enterprise applications.
- Administered workload identities, managed identities, and service principals for secure cloud resource access.
- Conducted Entra ID tenant consolidation and migration activities during mergers, acquisitions, and modernization initiatives.
- Optimized identity governance processes to improve compliance with audit and regulatory requirements.
- Led root-cause analysis and resolution of complex identity, authorization, and application access incidents.

• Xybion, Senior System Engineer

Nov 2019 – Jul 2022

- Implemented RBAC to manage user permissions and enforce secure access.
- Deployed Azure AD B2B/B2C solutions for secure collaboration and customer access.
- Configured DNS zones, including aging and scavenging, to maintain optimal performance.
- Set up Domain Controllers, Sites, Site Links, and Subnets to enhance AD structure and network efficiency.
- Configured and managed AD trusts across multiple forests for seamless resource sharing.
- Managed Private Key Infrastructure (PKI), including CSR, CRL, and certificate revocation.
- Resolved AD replication issues and ensured directory consistency.
- Configured GPOs and implemented server hardening, improving system security.
- Managed patches via WSUS to ensure compliance and uptime.
- Managed Azure AD App Registrations (SAML/OAuth) for secure application integration.

- Configured and maintained DHCP scopes and backups for reliable IP address allocation.
- Optimized Azure Storage GRS usage for high availability vs cost efficiency.
- Conducted risk management assessments, identifying and mitigating security threats.

Cognizant, Infra Technology Specialist

May 2019 – Nov 2019

- Configured NTP for accurate network time synchronization to maintain system integrity.
- Administered Kerberos authentication to enhance security and facilitate seamless user access.
- Monitored AD health checks across a multi-forest environment to ensure system stability.
- Conducted AD auditing and hardened systems to improve security and compliance.
- Troubleshoot DNS resolution issues and DHCP lease problems in real time to maintain network reliability.
- Streamlined ADMT migrations to consolidate and restructure Active Directory.

Wipro Limited, Senior System Engineer

Nov 2016 – May 2019

- Managed VM snapshots and templates to ensure efficient backup and deployment.
- Troubleshoot server event logs and performed root cause analysis for production issues.
- Designed and implemented AD migration projects, ensuring minimal disruption and data integrity.
- Administered FSMO roles to maintain Active Directory efficiency and reliability.
- Established and enforced security baselines to enhance compliance.
- Executed server commissioning and decommissioning for infrastructure refresh.

Rohlig Blue Services, Windows Engineer

Oct 2015 – Nov 2016

- Installed and configured VMware ESX/ESXi servers to support virtualized environments.
- Published applications via XenApp to improve user accessibility.
- Managed Squid proxy server to optimize network traffic.
- Created, cloned, and managed VMs, templates, snapshots, and VMotion tasks.
- Installed and configured Red Hat Linux servers and managed file permissions.

IBM, Operations Professional

May 2012 – Oct 2015

- Managed and assigned RSA tokens for secure authentication.
- Administered user accounts on role-based applications to ensure access control.
- Installed and troubleshoot hardware, drivers, and firmware to maintain performance.
- Configured and troubleshoot Hyper-V cluster shared volumes, iSCSI, and MPIO for storage and network connectivity.
- Managed FRS to DFR migration and performed Sysvol restoration for AD data availability.
- Used SCCM to deploy Windows security patches enterprise-wide.
- Troubleshoot user account and authentication issues in real time.

CMS Info Systems, FMS Engineer

Jul 2009 – Mar 2012

- Distributed software via SCCM across desktops to ensure updates were applied.
- Monitored servers and network devices using WhatsUp Gold and SCOM for system health.
- Coordinated BCP and disaster recovery activities to ensure business continuity.
- Troubleshoot account lockouts by identifying and resolving root causes.

SKILLS

Identity & Access Management: Active Directory DS, Azure AD Connect, Entra ID, GPO, MFA, Conditional Access, RBAC, PKI, LDAP/LDAPS, ADFS, SSPR

Cloud Platforms: Azure (VMs, Storage, Load Balancer, Automation), AWS (EC2, IAM, S3,)

Security & Governance: Zero Trust, AD Hardening, WSUS, Patch Management, CIS Baselines

Automation & Tools: PowerShell, ADSI Edit, DCDiag, RepAdmin, Git, JIRA, SCCM.

Infrastructure: Hyper-V, VMware, DNS, DHCP, Network Load Balancing

EDUCATION

MCA, Sri Krishna Engineering College

May 2005 - Jun 2008

B.Sc. Kongu Arts & Science College

Jun 2002 - Apr 2005

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert (AZ-305)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Identity and Access Administrator Associate (SC-300)
- AWS Certified Solutions Architect – Associate
